

## Subject Index Vol. 27 (6) 2022

- 1000-grain weight 308  
 13C-15N double labeling 253  
 16S rRNA gene sequencing 165  
 Absorption and transport 253  
 Acetogenins 341  
 Acute and Chronic Mortality 99  
 Adaptation Production potential 193  
 Adsorption 233  
 Aflatoxin 233  
*Agrobacterium* 203  
 Allelochemicals 289  
 Allelopathy 228  
*Alternaria alternata* 295  
*Alternaria porri* (Ellis) Cif. 393  
 Alternative management 228  
 Aminotransferase 139  
*Amorpha fruticosa* L. 203  
 Antibiotic plants 259  
 Antimicrobial 154  
 Antioxidant 341  
 Artificial Insemination 115  
*Aspergillus* 371  
 Auxin 105  
 Avocado by-products 341  
*Bacillus* spp. 08  
*Bemisia tabaci* 241  
 Bentonite 233  
 Bioavailability 284  
 Biodiversity 259  
 Biosafety 89  
 Bread wheat 381  
 Breeding 393  
 Brown plant hopper (BPH) 34  
*C. albicans* 154  
 Cabernet sauvignon 165  
 Callus 203  
 Carbon and nitrogen metabolism 321  
 Carbon dioxide 77  
 Carcass characteristics 277  
 Carotenoids 130  
 Catalase 139  
 Catfish 405  
 Central Kazakhstan 259  
 Chaetomium 19  
 Chemical control 431  
 Chemical control 83  
 Cherry radish 209  
 Chick feed 277  
 Chitosan 69  
 Circular economy 01  
 Clove 399  
 Clustering 184  
 Combining ability 381  
 Compost 423  
 Contaminated feed 233  
 Continued dominion 241  
 Control techniques 241  
 Core collection 184  
 Cotyledonary node 203  
 Cotyledonary nodes 105  
 Crop water productivity 60  
 Cultivated soybean 321  
 Cytokinins 105  
 De-oiled rice bran 139  
 Dexamethasone 28  
 Dicyandiamide 209  
 Differentially expressed genes 130  
 Directed sowing rape 43  
 Docking 413  
 Dose 332  
 Droplet deposition 315  
 Durian 19  
 Dyes decolorization 08  
*E. coli* 69  
*Eairas vittella* 147  
 Embryogenic callus 301  
 Energy use efficiency 60  
 Epitopes 413  
 Ethyl-methane-sulfonate 332  
 Eurotiales 371  
 F2 population 381  
 Farm animals 341  
 Fillet; *L. monocytogenes* 69  
 Fish colour 405  
 Fish morphology 405  
 Flumioxazin 123  
 Foliar spray of N 253  
 Food safety 89  
 Fungi 284  
 Fungitoxicity 83  
 Furans 341  
 Fusion glycoprotein 413  
 Future potential 193  
 Gamma radiation 53  
 Garlic 399  
 GC-Mass 69  
 Gene action 381  
 Genetic divergence 184  
 Genetic transformation 203  
 Genetics 393  
 Genomics 193  
 Global warming 405  
 GM Vegetables 89  
 Goat 28  
 Grasses 431  
 Green cane 431  
 Growth 270  
 Growth performance 233, 277  
 Healing 154  
 Heart rot 361  
 Heat Stress 115  
 Herbicides 175  
 IAA Production 08  
*In silico* 413  
*In vitro* culture 399  
 Inhibition 215  
 Insect growth regulator 147  
 Internal transcribed spacer 371  
 Intoxication 175  
 Irradiation 53  
 Joint action 241  
 Land use efficiency 60  
*Lantana camara* 99  
 Liver enzymes 277  
 Low nitrogen 321  
 Maize 270, 284  
 Mandarins 295  
 Media combination 399  
 Medicinal plants 259  
 Meristem culture 399  
 Microbial diversity 371  
 Microemulsion 69  
 Microsatellite markers 34  
 Milk 28  
 Milk qualities 193  
 Mineral soil 01  
 Modified atmosphere 77  
 Moneymaker 332  
*Moringa oleifera* 99  
 Morning glory 431  
 Mortality response 77  
 Mucuna leaf meal 139  
 Mulching 165  
 Multiepitope vaccine 413  
 Mutation 332  
 Mycelial growth 215  
 Mycelium 53  
 Nanoparticles 19  
 Natural Mating 115  
 Newcastle disease virus 413

Nitrate 209  
 Nitrogen fertilization 43  
 Nitrogen utilization efficiency 43  
 Novaluron 147  
 Nutrient content 270  
*Ochrobactrum anthropic* 215  
 Oil palm empty fruit bunch 53  
 Old leaves 321  
 Organ weight 277  
*Oryza sativa* L. 34  
*Paecilomyces* 371  
 Pathogen 393  
 PCA 184  
 Peach 130  
 Peanut 105  
 Peat 01  
 Penicillium 371  
 PGPB 423  
 PGPR 08  
 Phenolics 341  
 Phosphate solubilizers 423  
 Phosphatic fertilizers 284  
 Phosphorus 284  
 Phosphorus solubilization 08  
 Photosynthesis 209  
 Phytoalexin 19  
*Phytophthora* spp 361  
 Phytotoxicity 228  
 Plant extracts 99  
 Plant growth regulator 301  
 Plant growth-promoting bacteria 175  
 Plant regeneration 105  
 Planting density 43  
 Potential 28  
 Poultry 233  
 Pre-emergence 431  
 Pre-sprouted seedlings 175  
 Proline 270  
*Psammotermes hybostoma* 99  
*Pseudostellaria heterophylla* 289  
 Quantitative trait locus 34  
*Quercus infectoria* 154  
 Rabbits 115  
 Rainfed areas 308  
 Red rot 83  
 Regeneration 301  
 Repellent 99  
 Replant problems 289  
 Reproductive Traits 115  
 Resazurin 83  
 Residues 28  
 Resistance 295, 393  
 Resistance gene 34  
 Resource use efficiency 60  
*Rhazya stricta* 99  
 Rhizosphere bacteria 165  
 Rice 253  
 Root rot 19  
 Rosemary 69  
*Ruta chalepensis* 99  
*S. aureus* 154  
 Salinity stress 270  
 Sclerotia 215  
 Secondary metabolites 289  
 Seed germination 228  
 Seedling survival 228  
 Seedlings 423  
 Self-propelled boom sprayer 315  
*Serratia proteamaculans* 215  
 Sewage sludge 01  
*Sitophilus oryzae* 77  
 Smooth cayenne MD2 361  
 Sodium chlorate 123  
 Soil chemical properties 165  
 Soil fungal diversity 371  
 Soil properties 361  
 Somatic embryogenesis 301  
 Sorghum 301  
 Soybean 184  
 Spawn 53  
 Spore 123  
 Spray loss 315  
 Spray operational parameters 315  
 Struvite 01  
 Sub-lethal concentration 147  
 Sugarcane 83  
 Super oxide dismutase 139  
 Superphosphate 01  
 Survival mechanism 241  
 Synergistic 123  
 Termites 99  
 Termiticide 99  
 Thidiazuron 399  
 Tomato 332  
 Transcriptome sequencing 130  
 Transgenic plant 89  
*Trichoderma* spp 215  
 Two-sex life table 147  
 UHPLC-QTOF-MS 289  
 Validation 184  
 Vegetable oils 228  
 Vertical boom sprayer 315  
 Vertical hydroponics 60  
*Vigna radiata* 08  
*Vitis vinifera* L. cv 165  
 Wheat variety 308  
 Wild soybean 321  
 Wine grape quality 165  
 Yellow rust 308  
 Yield 43, 270, 308  
 Yield productive traits 381  
 Young leaves 321
